

TALSIGHT™
Thermal Imaging for Law Enforcement

Bullard®

**“Detecting the otherwise
unseen is what makes
thermal imaging a
valuable asset in law
enforcement. The
TacSight Thermal Imager
is an outstanding tool for
detecting threats and
uncovering evidence.”**

**-Detective Mark Chandler
Roanoke, Virginia**

Take charge with one of the most valuable tools for law enforcement.

Fugitive Searches

When ambient light, flashlights or searchlights fail to illuminate a suspect, the suspect's body heat will most likely still be visible to the Bullard Thermal Imager. Monitor suspects without projecting any beam.

Officer Safety

A Bullard Thermal Imager can contribute to officer safety at a number of scenes. Identify fluid leaks or power lines that have been knocked to the ground at a collision scene. Identify fences, dogs and other hazards that may be lurking beyond the range of an officer's flashlight.

Surveillance

Because the thermal imager does not require light and only receives heat energy, it can be used to observe potential criminal activity at a distance.

Hidden Compartments

The thermal image will show a suspicious heat signature that can lead an officer to further investigation.

Collision Investigation

Investigators can use the Bullard Thermal Imager to identify the direction of travel, where a vehicle left the roadway and how long the vehicle was braking. It can also be used to help locate victims that may have been ejected from the vehicle.

Marine Patrol

A Bullard Thermal Imager can help marine officers covertly monitor an area for illegal activity, such as when smuggled goods are left floating in the water for later pick-up. The heat sources of boats, personal water craft and even swimmers will contrast starkly to the background temperatures of the water.

S2 Thermal Imager: Tactical Advantage

This cost-effective thermal imager provides state-of-the-art performance for the unique needs of law enforcement.

Optics Selection

The Bullard S2 is available with either a 50 degree wide angle lens for close up entry missions or an 11 degree lens for longer range surveillance missions. Simply select the lens most appropriate for your department at time of purchase.

Display Dimming

In situations where stealth is required, the display can be dimmed or turned off to prevent detection.

Electronic Threat Tagging™ (optional)

A breakthrough scene enhancement feature for law enforcement, the Bullard Electronic Threat Tagging allows the operator to selectively apply a distinctive blue color overlay to suspected threat objects, people or animals without distraction from background details. The Electronic Threat Tagging enhances the tagged target so that they are clearly distinguished from other heat sources in the scene. Just one more safety and operational innovation for law enforcement from Bullard.

without Electronic Threat Tagging

with Electronic Threat Tagging

S2 Features & Benefits

- 160x120 detector resolution
- Screen dimming control
- Simple, one-button operation
- Extreme durability

SE35 Thermal Imager: Advanced Detail

You'll find optimal versatility and advanced features in the SE35 Thermal Imager.

4x Digital Zoom

Bullard introduces 4x Digital Zoom on the TacSight SE35, providing maximum human form detection at 635 meters.

Versatile as a tactical tool, the SE35 becomes a long-range nighttime surveillance tool in zoom mode.

4x Zoom

Display Dimming

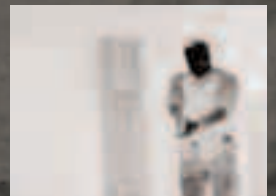

In situations where stealth is required, the display can be dimmed or turned off to prevent detection.

Switchable Polarity

The TacSight SE35 incorporates the ability to switch from the "white hot" to the "black hot" image. This feature illuminates details that might otherwise be misinterpreted or missed altogether.

black hot

Variable Focus

The variable focus feature allows the SE35 to resolve objects from 1/2 meter to infinity.

SE35 Features & Benefits

- 320x240 detector resolution
- Screen dimming control
- 2x and 4x digital zoom
- Reverse polarity
- Image enhancement
- Variable focus

No other thermal imager offers law enforcement agencies the ability to configure this critical tool specifically for the mission at hand the way TacSight does. These powerful accessories are easily attached to or configured with the TacSight to provide the optimum in thermal imager effectiveness and officer safety.

MobileLink

The only lightweight Handheld Receiver available for thermal imagers, MobileLink brings the action from the TacSight to the palm of your hand. Stay mobile and see the threats that the TacSight operator sees with the MobileLink.

Wireless Transmitter

Housed in an attachable handle, the multi-channel transmitter enables monitoring thermal imaging video (typical performance of up to 600 feet inside commercial construction). Wireless transmission is ideal for remote monitoring or for tactical scenarios where officer safety and covert positioning is important.

TacPort

TacSight can be converted from a highly mobile, handheld device to a longer term, fixed position surveillance unit. The TacPort attachment provides video-out functionality and auxiliary power ports for extended operation from an external power supply.

Mobile Command Center

The Mobile Command Center is the ultimate receiving unit for command and control requirements. Scene commanders can view, record, and playback thermal imaging video transmitted from the TacSight Thermal Imager.

ACCESSORIES

TacScope

The only attachable / detachable monocular eyepiece available for thermal imagers, TacScope instantly transforms the TacSight into a monocular viewfinder, which will not backlight the user's face, for enhanced safety in high threat situations.

TacPowerhouse

The TacPowerhouse Charging Station houses and continually charges the TacSight. The unit fits securely in the charger and will also accommodate the attachable handle. An additional slot keeps a spare battery charged, and a storage compartment conveniently holds an alkaline battery pack or other items. (Not compatible with SE35.)

Alkaline Battery Pack

No more fumbling with a pocket full of alkaline batteries in the dark or a high threat situation. The alkaline battery pack is a perfect backup option to standard rechargeable batteries or for organizations that prefer a disposable battery solution.

Retract Strap

Keep your gear close at hand with the Retract Strap. Perfect for managing equipment under extreme circumstances. The Retract Strap attaches with a stainless steel clip.
